

"At Acendas Travel our goal is to offer truly flexible and comprehensive solutions for all aspects the traveler experience while supporting the corporate travel program at the same time."

Our Acendas Connect mobile technology automatically updates our travelers' itineraries and alerts them to flight status right in the palm of their hand. With Acendas Connect, they can easily manage flight, hotel, and car reservations, and they can see their invoices and get an immediate connection with their agent if needed.

We have also integrated our Journey Monitoring risk management service into the Acendas Connect to continue to take care of our travelers while they are on the go. The Acendas Connect app allows Acendas to send push notifications to travelers through the Journey Monitoring portal and record a traveler's GPS location when they check in.

FOCUS ON TRAVELER EXPERIENCE

Through the Acendas Connect mobile apps, Acendas Travel delivers a superior digital experience that allows them to support their travelers at every stage of their journey.

"We chose Mantic Point because they are an excellent partner. There is a broad range of traveler experience features as well as a flexible approach to implementation. Mantic Point understand our business and is very responsive to ideas that we bring forward."

Brent Blake
Owner, President

INTEGRATED DUTY OF CARE

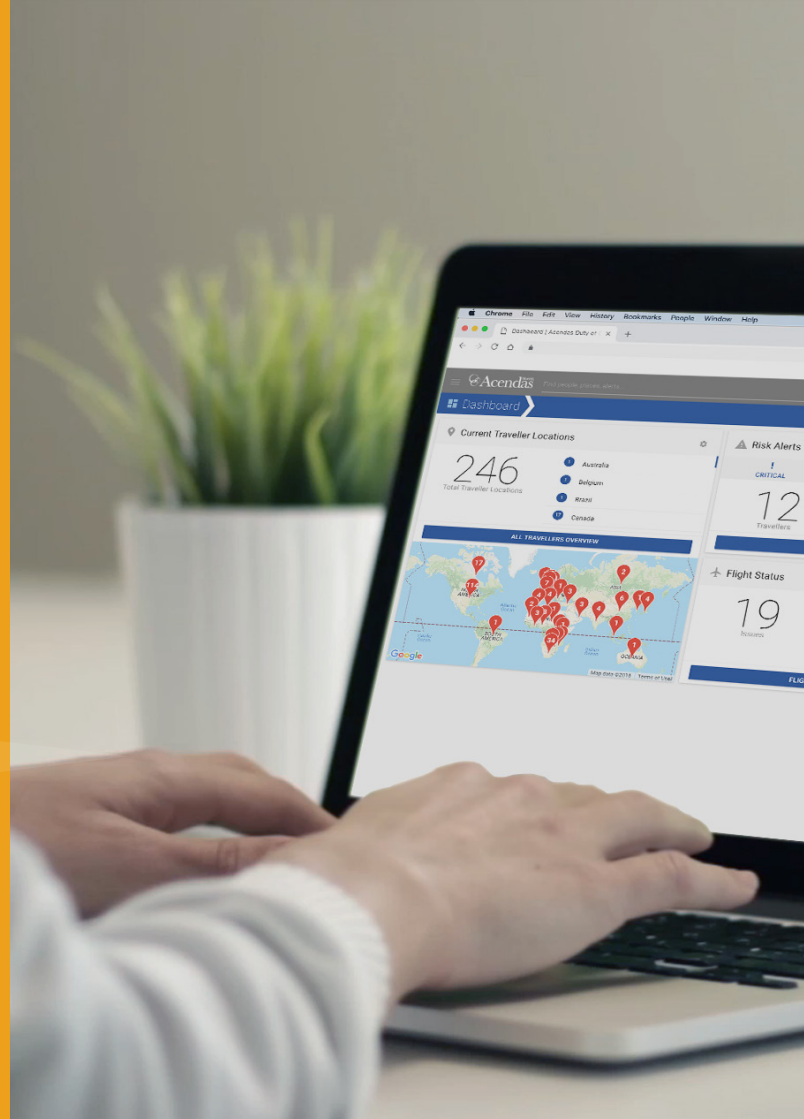

Mobile, messaging and portal

The Acendas Connect mobile apps are seamlessly integrated in to the Acendas Travel duty of care Journey Monitor service providing automated traveler alerts and impacted traveler reports for the travel manager. Two way messaging and GPS location means Journey Monitor provides the visibility and insight to travel risk management.

"Acendas is committed to keeping our travelers safe and providing them an excellent experience through our technology and our technology partners."

Ken Augustine
Director of Travel Technology

INTEGRATED TRAVELER INVOICE & RETRIEVAL

Access financial information via mobile

Travelers can access important financial information about all their trips anytime within the Acendas Connect apps. Each itinerary contains all the invoice information relating the the travelers trip including exchanges, fees and payment information.

Share past itinerary invoices

When travelers need to share their itinerary invoice Acendas Connect mobile app travelers can send a copy to their colleagues or expense solution with just a few clicks, making life easier when on the go.

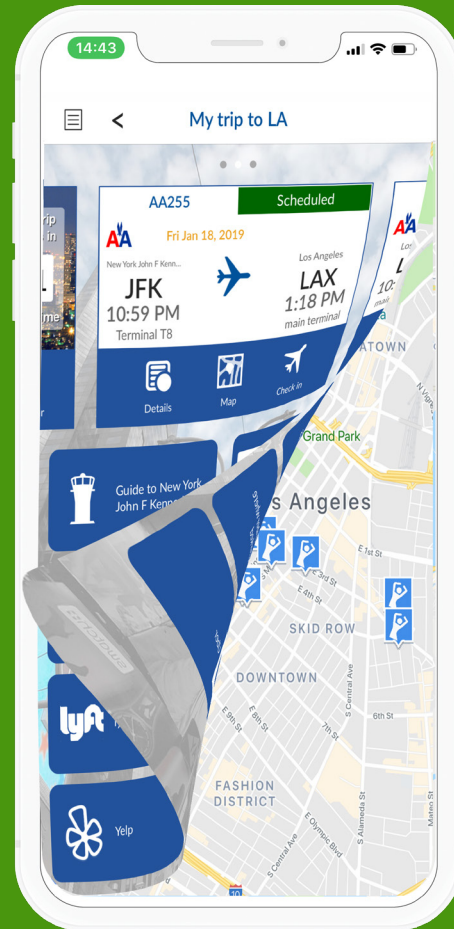

POWERFUL ITINERARY MANAGEMENT

One location for all trip information

Multi-GDS and off GDS content combined into a single, consolidated itinerary delivered seamlessly to the travelers mobile app. Automatic trip updates for all trip segments means the Acendas Connect traveler always has the latest information they need.

Greater access, more control

Acendas Connect travelers have more control over their itinerary with self-serve features such as airline check in, GPS location, directions as well as adding in those important amendments such as meetings or restaurant reservations.

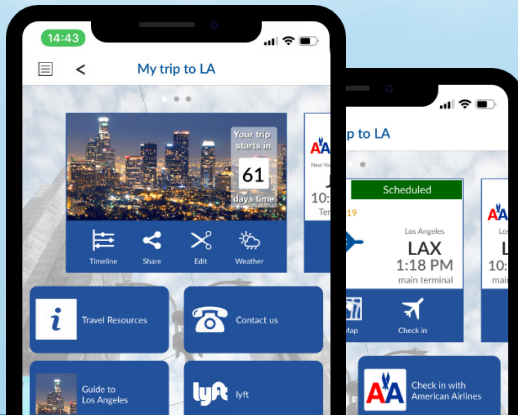

DOING MORE TO HELP

Airline check in and status

Acendas Connect mobile travelers receive notifications on when its time for check in and updates on flight status for all of their flights.

Supporting the travel booker

Acendas Connect keeps the travel booker updated about the status of their travelers trips with automatic itinerary updates, flight status and risk alerts direct to their mobile app.
